Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 2 recites the limitation "the product" in lines 3-4 of the claim. There is insufficient antecedent basis for this limitation in the claim.
4. Claim 4 recites the limitation "the remaining credit" in lines 3-4 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1, 3, 5, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Long. Long teaches a payment system for an automatic vending machine (100)

comprising a microprocessor (132) which can be programmed to identify the fingerprints of a user acquired by an electronic acquisition apparatus (see col. 3, lines 36-49). Long does not teach the memorization of memory elements, the transmission of fingerprint data to an archive, the electronic processing of images, or the comparison of scanning points of an image. However, these are inherent steps of fingerprint identification.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Long in view of Leason et al. Long teaches all of the limitations detailed in paragraph 6 of this Office Action. Long does not teach the step of scaling down a product value on the basis of the products consumed by a purchaser. Leason et al teach a vending machine that scales down prices based on the products consumed by a purchaser (see Fig. 4). Leason et al further teach the step of controlling the remaining credit of a customer (see col. 3, lines 18-29). It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the teachings of Leason et al with the invention of Long to provide incentives for customers to make multiple purchases, thereby generating more revenue.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nelson, Johnson, Jr., and Pease et al disclose vending machines with fingerprint detectors. Tognazzini, Tedesco et al, and Menoud disclose vending machines that scale prices for customers based on the products bought.
